Scrum: The Basics
Chapter Quiz

You answered 7 of 7 questions correctly. [Continue watching](#) [Retake quiz](#)

Question 1 of 7
With the Agile Manifesto, which project element was made flexible?

- time
- scope
Correct
By locking everything but scope, you are given a framework that will deliver exactly what is needed as quickly as possible.
- cost
- review

Question 2 of 7
What are two key Scrum roles?

- Tester and business analyst
- Sponsor and developer
- Project Manager and Business Expert
- Product Owner and Scrum Master
Correct

Question 3 of 7
What are the 3 normal project constraints?

- time, cost, scope
Correct
- cost, time, stakeholders
- space to work, time, software bugs
- team members, skills, cost

Question 4 of 7
Why was the role of Scrum Master developed?

- to interact with stakeholders and maintain the product vision
- to order the work and ensure that Scrum Team members clearly understand the details of the requests
- to define and manage the backlog of work to be done and prioritize those work items
- to help the Scrum Team resolve day-to-day issues and counterbalance the ongoing requirements changes
Correct
The Scrum Master is a dedicated role that protects the team, and also helps them improve their internal team processes.

Question 5 of 7
Why are team norms established before any work is started?

- to create a Scrum Board
- to prevent trouble
Correct
Team norms are commitments made on how the team will work together, resolve disagreements, and reach design consensus.
- to design a minimum viable product (MVP)
- to establish a burn-up chart

Question 6 of 7
What do you use to establish ground rules with the Team?

- Team Norms
Correct
- Team Rules
- Best practices
- Guidelines

Question 7 of 7
Who reviews the team's work and ensures that the highest value is being delivered?

- the Product Owner
Correct
The Product Owner orders the work and ensures that Scrum Team members clearly understand the details of the requests.
- the stakeholders
- the Scrum Team
- the Scrum Master
