Retake quiz

Question 1 of 8

Within the Scrum Team, who usually writes the user stories?

- any member of the Scrum Team
- the Product Owner
Correct
The Product Owner, or PO, is usually responsible for writing the user stories.
- the stakeholders
- the Scrum Master

Question 2 of 8

What type of estimation do Scrum Teams use to size their stories?

- Specific estimation
- General estimation
- Universal estimation
- Relative Estimation
Correct

Question 3 of 8

When is the vision for your product established?

- before any work begins
Correct
The vision is the map that will guide you and your team to your destination, and is established by the Product Owner before any work begins.
- while you are working
- at the end of every Sprint
- during a Sprint Review

Question 4 of 8

What do Scrum Teams use to break their work into small, deliverable elements?

- Mock ups
- User Stories
Correct
- Diagrams
- Requirements

Question 5 of 8

How is relative estimation used in Scrum?

- by comparing the Product Owner and the Scrum Master's feedback
- by reading a map to receive specific instructions
- by comparing the minimum viable product (MVP) to the stakeholder's feedback
- by comparing user stories to each other
Correct
By using relative estimation to compare user stories to each other, you get a rough size of your work.

Question 6 of 8

How should your team establish its cadence?

- by the shortest feasible Sprint length possible
Correct
Scrum states that your Sprint can be anywhere from one to four weeks in duration, with a preference toward the shorter timescale.
- by reviewing code and having all errors fixed
- by sequencing stories in value order
- by testing the story in the prerelease environment

Question 7 of 8

The Roadmap is meant to apply your work Themes over time.

- FALSE
- TRUE
Correct

Question 8 of 8

Your roadmap is an estimate of ____.

- your Scrum Team's set of principles
- your Chaotic Domain
- when the team will complete their stories
Correct
The roadmap is an estimate of when your team will complete their stories, and it should be updated at the end of every Sprint.
- the Forecast of Functionality
