Retake quiz

Question 1 of 8

Why is a backlog refinement event usually held around midpoint of the Sprint?

- to evaluate what new items have come up
Correct
At least once per Sprint, the whole Scrum Team meets to evaluate the new items that have come up.
- to compare user stories to each other
- to update the team's vision
- to create team norms

Question 2 of 8

The Scrum Team must always work their stories in priority order.

- FALSE
Correct
- TRUE

Question 3 of 8

What do Scrum Teams use to visually represent their project?

- information heaters
- Status charts
- Progress simulators
- Information radiators
Correct

Question 4 of 8

All of the following are TRUE about the Daily Scrum except ____.

- everyone stands up
- it lasts 30 minutes
Correct
- everyone answers the same 3 questions
- it lasts 15 minutes

Question 5 of 8

Before verifying the team has the capacity to complete the work, what do you need to know?

- the information on the Scrum Board
- the Chaotic Domain
- hours for all the planned work in the Sprint
Correct
As a general guide, remember that in an eight-hour working day, people usually only have about six hours of productive time.
- your Story Point

Question 6 of 8

In order for Scrum to work, what does the Daily Scrum meeting rely on?

- time, effort, and goals
- collaboration and communication
Correct
The Daily Scrum includes all three Cs, and is the expected cadence for communication and collaboration.
- questions, answers, and results
- creativity, delivery, and expectations

Question 7 of 8

Which scenario is an example of an information radiator?

- getting specific data from point A to point B
- determining the velocity of the Sprint
- hosting a Sprint Review
- posting a burn-down chart on the wall
Correct
An information radiator is anything you post on your team sites or walls that helps the team understand the work and its progress.

Question 8 of 8

The PO can add a new story to a Sprint that the Team is currently in.

- FALSE
Correct
- TRUE
