Question 1 of 3

Which of these is not a sign of a good Scrum Master and well-functioning team.

high-quality product

no defects are ever found

Correct

It's impossible for any team to work and never make mistakes; defects are common learnings for all teams.

fully-functioning product

Sprint commitments met

Question 2 of 3

Which role on a scrum team is the business representative?

the Product Owner

Correct

The Product Owner is the business representative on the team and is responsible for what the team builds.

the Team Leader

the Development Team

the Scrum Master

Question 3 of 3

Why is it important that the PO and SM have different points of view on the activities and outputs of the team?

The balance between the two keep the team moving in the right direction at a sustainable pace.

Correct

The healthy opposition between PO and SM helps the team find a sense of balance between sustainability and delivery.

The PO wants the most the team can produce and is less concerned with sustainability.

The PO would expect an unlimited time for the team to work on their product.

The SM would allow the team to celebrate even if they do not deliver fully functioning product.
